Factory Applications

ECOGLO, INC.
MAY 22, 2012

ECOGLO PRODUCTS:

- **F Series Stair Nosings**
- **Stair nosing mounting hardware for metal stairs**
- **OB20025-TP Obstruction Tape**
- **G and H Series Guidance and Handrail Strip**
- **Directional and Exit signs**
- **Product UL 1994/ULC S572 listed**

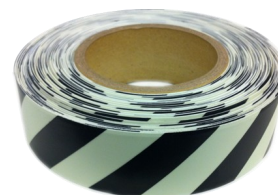

Factory Safety

Factories, warehouses and industrial plants are difficult places to evacuate when in blackout conditions. Very often the existing emergency lights are ill-prepared for the task of lighting or marking a safe evacuation route. Pillars and equipment become obstacles for crews suddenly plunged into near dark conditions.

Ecoglo photoluminescent products are the answer to providing a safe evacuation route. UL 1994/ULC S572-listed path marking signs and guidance strips demark a continuous line of evacuation, providing directional information at every point where an evacuee

must make a quick and informed decision about direction. Marking obstructions with Ecoglo Obstruction Tape ensures that your crews avoid any protruding objects and potential accidents while following the route out of your facility.

Ecoglo OB20025-TP Obstruction Tape

Photoluminescent path marking systems clearly indicate means of egress, unaffected by power failure, smoke, or fire.

Stair Nosing

One of the challenges in photoluminescent pathmarking has been on metal stair cases, especially perforated or grated tread designed to allow dirt to fall through the flat and provide a non-slip surface. In pitch black darkness, these stairs are highly treacherous.

Ecoglo has developed a stair nosing mounting system that installs flat to almost any step and resolves potential tripping hazards. The permanent fit of aluminum nosing containing Ecoglo photoluminescent contrast strips

provides added safety in normal conditions. In blackout conditions, the high visibility of Ecoglo contrast strips and the slip resistance of the tread together provide a complete and continuous line across the step edge ensuring your crews can navigate the

stairs even in smoke.
